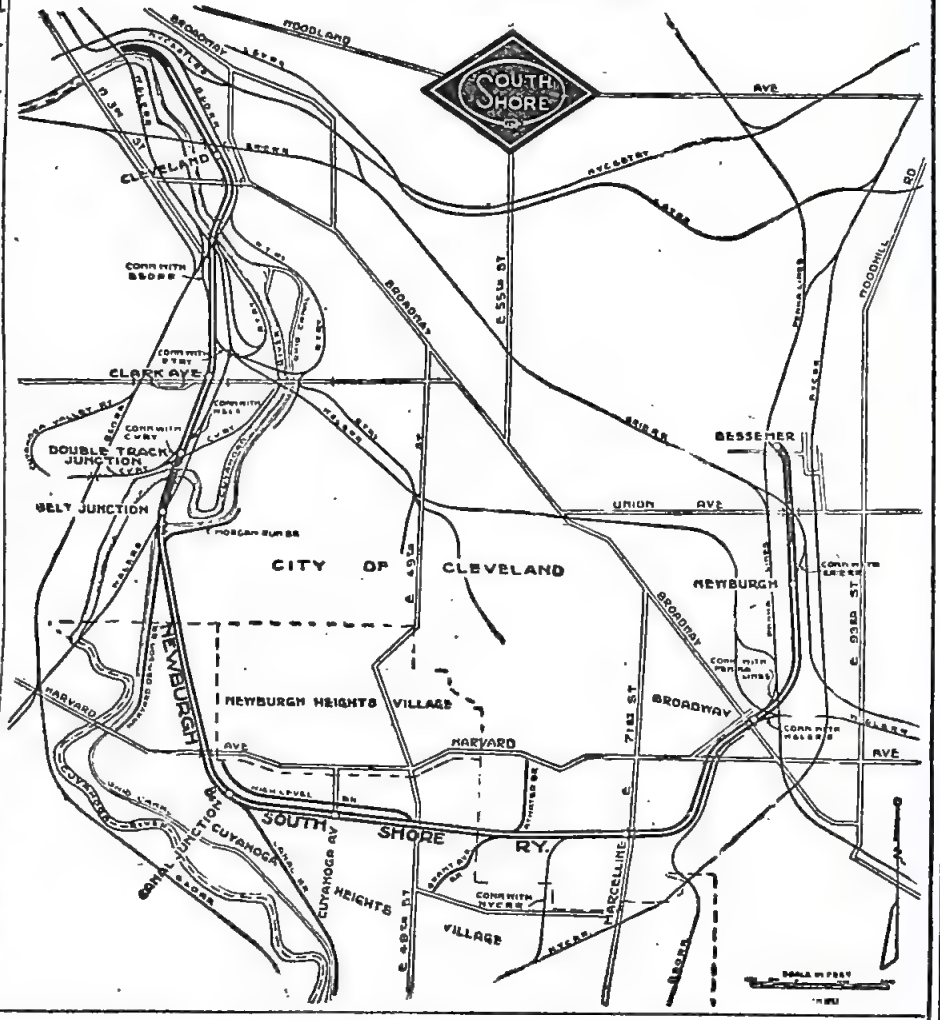
SOUTH SHORE BELT LINE



This road handles only carload freight in terminal switch movement between industries on its line and other railroads, or in intermediate switch movement between railroads.

As a belt line it offers direct and prompt interchange facilities with all railroads entering Cleveland, O., thereby affording shippers the advantage of ample car supply for loading, together with the choice of routing their shipments.

Commodious storage yards at Marcelline and Clark Avenue allow the acceptance and handling of cars in large volume as required to properly serve all industries.

Industrial sites are still available along this road in the southern section of the city, centrally located and traversed by a crosstown car line.

Cleveland freight rates apply on all in and outbound carload traffic.

Settlement of Interline Switching and Car Service Billings should be made through H. J. GRANCE, Treasurer, 2515 Grant Building Pittsburgh 19, Pa.

INDEX OF RAILROAD STATIONS

On the Railroads of the United States, Canada, Mexico and Central America.

FOR INDEX OF POINTS REACHED BY WATER ROUTES, SEE PAGES 1253-1256.
FOR INDEX OF POINTS SERVED BY AIR PASSENGER TRANSPORTATION LINES, SEE PAGES 1494-1496.
FOR LIST OF NATIONAL PARKS IN THE UNITED STATES AND CANADA, SEE PAGE 1497.
FOR LIST OF MILITARY POSTS AND CAMPS IN THE UNITED STATES, SEE PAGES 1498-1500.
FOR LIST OF HOSPITALS MAINTAINED BY U. S. GOVERNMENT SEE PAGE 1501.

NOTE—Number opposite stations refers to table in which station is shown in representation of road. Stations marked * are on the line indicated, but are not shown in time-tables in the representation in the body of THE GUIDE.

NOTE.—Wherever the name of any road has been abbreviated in the Index of Stations the full name may be found by comparing the initials or other abbreviation with the names of roads in the Index of Roads in the front part of THE GUIDE.

KEY.—At cities or villages touched by more than one road, if the same letter follows the names of the roads, the same depot or station house is used by both or all roads. Where the depots are in different locations they are designated by distinctive *italic* letters in parentheses, thus (*a*), (*b*), (*c*), etc. Roads having the same letters affixed occupy the same depot, having different letters affixed, they occupy separate depots. Two or more letters affixed indicate that the trains of that particular road stop at the several depots designated. Figures thus (1), (2), are affixed in some cases to distinguish stations bearing the same name and located in the same county and State, but not within the limits of the same city or village. Italic notations refer to the station immediately preceding such notation. *"Depots adjacent"* means generally not over 100 yards apart.

The official abbreviations of the States and Territories in Central America and the Republic of Mexico, as shown in connection with the entry of Central American and Mexican points in this Index, are as follows:
